## Coca-Cola company trials first paper bottle

12 February | Comments

Coca-Cola will run its first test with 2,000 bottles to see how they hold up

Coca-Cola is to test a paper bottle as part of a longer-term bid to eliminate plastic from its packaging entirely.

The prototype is made by a Danish company from an extra-strong paper shell that still contains a thin plastic liner.

But the goal is to create a 100% recyclable, plastic-free bottle capable of preventing gas escaping from carbonated drinks.

The barrier must also ensure no fibres flake off into the liquid.

That would pose a risk of altering the taste of the drink - or potentially fall foul

## What is Nestlé doing to tackle plastic packaging waste?

Our vision is that none of our packaging, including plastics, ends up in landfill, in oceans, lakes and rivers. We are working hard to deliver on it and help achieve a waste-free future.

To achieve this, our commitment is that 100% of our packaging is recyclable or reusable by 2025. We've made a number of global commitments

## Athens landfill to be expanded, again

■ Giorgos Lialios

16.11.2018 • 16:29

The capital's main landfill at Fyli, northwestern Attica, is heading for a third enlargement to deal with overflowing waste, as the construction of new facilities to

JP Morgan, at the end of the 19th century, was the wealthiest and most respected banker of his generation

One day, during a conference, he was asked:

- « Mr Morgan, according to you, what will do the stock exchange market in the future ? »

Mr Morgan, after a silence, replied:

- «Well, according to me, in the future, the stock exchange market will fluctuate!!»
