

Volker Gehr elected Vice Chairman of INGEDE Stefan Endras and Alejandro Rodriguez left INGEDE Board

In its summer meeting, the INGEDE Board elected Dr Volker Gehr Vice Chairman. Volker Gehr is member of the Management Board of Steinbeis Papier in Glückstadt, Germany, and is responsible for R&D and Technical Services. Within the INGEDE Board, Volker Gehr is in charge of communication and will make sure that the interests of the deinking industry will be heard in politics and public. In ad-

dition, he will take care also for the internal communication and give technological input to INGEDE's work, particularly as operator of high brightness deinking systems. Volker Gehr's education and PhD thesis was in wood science, and he can look back to more than 20 years of experience in pulp and paper technology, first with Voith's stock preparation division and then with Steinbeis Papier.

The INGEDE Board also had to disband two members. Stefan Endras, being the Vice Chairman of INGEDE in the past years and having taken care for European activities like the European Recovered Paper Council in Brussels, has to leave due to the termination of his contract with Utzenstorf Papier, Switzerland. Alejandro Rodriguez of Holmen Paper Madrid and taking care of the Southern European members, resigned due to the sale of the mill to International Paper. On behalf of the INGEDE Board and the members, Thomas Krauthauf thanked Stefan Endras and Alejandro Rodriguez for their activities for INGEDE and the deinking industry and wished them good luck for their future.

DIN SPEC 55700 published Copies for members available at INGEDE Office

On initiative of INGEDE, the German standardisation body DIN developed and published DIN SPEC 55700 – Paper and Pulp – Deinkability test for printed paper products in August 2016. The document in English language is a combination of the INGEDE Methods for deinkability testing – INGEDE Methods 1, 2 and mainly INGEDE Method 11. Besides DIN and the INGEDE Office, the members Steinbeis Papier, Stora Enso and UPM as well as the research institutes PMV and PTS were invol-

INGEDE Member News (for members only)

ved. With this activity, INGEDE made not only a combination of the three methods but also modernised and adapted some definitions. Much care was taken in not making any changes which could *endanger the validity of the existing deinkability* results.

DIN has the same strict copyright on the document as with standards, therefore copies on paper or for download have to

be ordered at Beuth Verlag (www.beuth.de). INGEDE has enough copies available to provide one for every member company. We ask member companies to name the recipient to Elke Berger (elke.berger@ingede.org) for one free copy. This copy may be printed once and installed on a work station computer but not in an intranet or similar.

Internationaler Branchentreffpunkt für Papier & Karton

Das PTS Papier & Karton Symposium am 6.-7. September 2016 im Leonardo Royal Hotel in München wird ein Highlight des Veranstaltungsjahres für die Papierhersteller und Verarbeiter werden. Gerade in Zeiten des Umbruchs ist es wichtig, die neuesten Entwicklungen und Innovationen auf dem Gebiet der Papierwirtschaft zu kennen.

Die Herausforderungen und zu lösenden Aufgaben sind vielfältig: das Internet der Dinge verändert unsere Wertschöpfungsketten grundlegend und Papier als Gebrauchsmaterial und Werkstoff muss seine Zukunft neu definieren. Wir alle sind von diesen Prozessen unmittelbar berührt

PTS Papier & Karton Symposium 2016

Leonardo Royal Hotel | München

und als Akteure aufgerufen, diese Zukunft durch innovatives Handeln zu gestalten.

Folgende Themen stehen im Mittelpunkt:

Session 1: Die Zukunft gestalten - mit Produkten auf Papierbasis

Session 2: Druck in der digitalen Zukunft

Session 3: Lebensmittel- und Pharmaverpackungen: Sicherheit geht vor!

Session 4: Industrie 4.0: Digitalisierung statt reiner Automatisierung

Session 5: Innovative Technologien und Produkte in der Papier- und Kartonherstellung

Improved Resource Efficiency in Paper & Board Production - REFFIBRE Final Conference

The REFFIBRE project (2013-2016) developed tools for the paper and board industry to quantify the impact of new production processes, modified raw materials and product innovations on process performance, end product specifications and environmental indicators. These tools enable paper makers to evaluate innovations affecting profitability in the value chain.

Paper and board are unique products being both the end products as well as the main raw materials for the next cycle; thereby creating a circular economy. To ensure long term profitability, the industry needs to focus on resource efficiency, product innovations and added value from side-stream utilization. This conference will give insight into the progress made through the multinational cooperation within the REFFIBRE project. Tools to predict paper strength and to control processes and value chains will be focused.

Please note: The PTS Paper & Board Symposium takes place in Munich on

the days preceding this event, 6-7 September. Find more information on www.paper-board-symposium.com. Take the opportunity to combine the events!

Printing for Fabrication 2016

Materials, Applications, and Processes the 32nd International Conference on Digital Printing Technologies (NIP)

Manchester, United Kingdom
12 - 16 September 2016

Print-based fabrication, functional materials, and applications - Writing the next chapter

The printing industry continues to move forward. Familiar digital printing technologies continue to advance, particularly in the area of high-speed and single-pass output. New applications mean print quality, color science, image processing, and workflow continue to be active areas for improvement. Concurrently, technologies that extend beyond marks on paper are playing an increasingly important role in redefining what it means to print something... <http://www.imaging.org/site/ist/>

Axel Fischer of INGEDE will present there

Why visit RWM 2016?

Bringing the industry together to rethink waste as resource, RWM is the perfect event for anyone responsible for re-

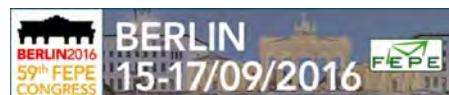

source and waste management for their organisation or working within the sector. It is a great opportunity to meet with an exciting list of over 700 exhibitors and sponsors including Viridor, SITA, Novelis, Stobart and JCB and hear from a fantastic line up of over 150 speakers from Kingfisher, Rolls-Royce, ESA, The Resource Association, The Green Investment Bank and more. Come along to find out how RWM can help you manage your challenges.

Elmia

Waste & Recycling is the self-evident meeting place for professionals in the waste and recycling business.

<http://www.elmia.se/en/waste-recycling/>

More than 145 Peer-Reviewed Technical Presentations addressing key issues facing mills today.

Insight into Strategies and Techniques that improve mill efficiency and reliability.

Workshops designed to give the "hands-on" experience needed to be immediately effective.

Career Development Track designed to help young professionals/engineers grow in this industry.

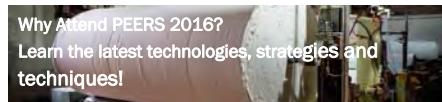

10 Program Tracks focused on your specific areas on interest.

Multiple Networking Opportunities among the industry's top Pulp and Paper Mill professionals.

Best Practices Discussions covering all areas of your Mill operation.

New Technologies and Products exhibited throughout the event.

Access to FOUR High-powered Conferences in ONE location.

DOXNET vor Ort

Diese Reihe findet als Halbtageskonferenz in Kombination mit internationalen Messen (z.B. drupa) oder Veranstaltungen führender Hersteller (Hunkeler Innovationdays Schweiz, Dataform Datafest Österreich, etc.) statt.

Die nächste Veranstaltung findet **am 03.-04.10.2016 in Wien und Großbeersdorf** statt.

<http://www.doxnet.de/termine/>

DOXNET-Tag

Mit dieser etablierten Veranstaltungsreihe wollen wir mit allen Mitgliedern und Interessierten aktuelle, spezifische Themen diskutieren und näher bringen. Damit reagieren wir auf Veränderungen am Markt oder beleuchten Themen, die alle Mitgliedergruppen betreffen oder interessieren. Themen der letzten Jahre wie Ausbildung oder Zertifizierungen im Druckzentrum und ECM haben viele Besucher nach München gebracht.

270 Exhibitors, 5000 Visitors: this is MIAC in Lucca (Italy)!

10-12 October

Visiting MIAC means obtaining a full overview of the technology and equipment available to the paper industry sector thanks to the constant participation of the leading companies in the sector which present the latest developments in machines, systems and avant-garde solutions to improve the management of the various stages in the paper production cycle.
