

IMPACTPapeRec Project Conference and Informative Meeting

Project conference & Networking informative meeting
24 January- Barcelona, Spain

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 690182

Local organizers:

With presentations from:

PROJECT CONFERENCE

After the Conference the attendees will be able to:

- ✓ Identify the main challenges and opportunities on paper for recycling
- ✓ Discover the challenges identified on Belgium, Romany, Poland, UK and France.
- ✓ Learn about paper collection systems applied in Spain and Germany.
- ✓ Find out about the quality required in the paper industry of paper for recycling
- ✓ Discover what experts think about Pay-as-you-throw systems, incentives and the informal sector

NETWORKING INFORMATIVE MEETING

Share your ideas during a dynamic session* focused on 4 topics related to PfR (Paper for recycling):

NETWORKING LUNCH

- 1) Best Practices for enhanced collection of Pfr
- 2) Incentives to recycling of Pfr
- 3) Policy-making development for Pfr
- 4) Standardization actions on Pfr

* A report with the main ideas extracted from the workshop will be shared with the attendees to this session.

IMPACTPapeRec invites you to join the Project Conference and Informative Meeting to be held 24 January 2017 in Barcelona, Spain. Join both events to learn more and share your ideas to in-

crease separate collection of paper for recycling in Europe.

The INGEDE office team wishes a
Merry Christmas
and a prosperous and happy New Year!

Auch Geschenkpapier kann recycelt werden

Damit das Altpapier sortierbar bleibt – Tipps für den Morgen nach Weihnachten

Weihnachten bedeutet eine Flut kleiner und großer Aufmerksamkeiten, aber auch eine Flut von Verpackungen. Was in der Altpapiertonne landet, muss nach einer maschinellen Vorsortierung zum Schluss **von Hand** wieder auseinandersortiert werden – zumindest dann, wenn aus dem Altpapier wieder Papier für neue Zeitungen werden soll. Die braunen und grauen Fasern im Karton können beim Recycling nämlich nicht

in weiße Fasern verwandelt werden.

Deshalb trennen sich hier die Wege: Weißes Papier geht in die Papierfabriken, um daraus wieder Zeitungspapier herzustellen. Ein Gemisch aus weißem Papier und braunem Karton wird von Kartonfabriken verwertet.

Und so kann die Flut der Verpackungen besser sortiert und verwertet werden:

- **Geschenkpapier möglichst nicht zerknüllen**, sondern flach ins Altpapier legen
- Schnüre, Bänder und Aufkleber entfernen

- Klebstreifen und Selbstklebeetiketten nach Möglichkeit entfernen (Reste von Klebstoffen stören die Papierherstellung)
- Verwenden Sie deshalb für Ihre Weihnachtspost möglichst nur Nassklebende und keine selbstklebenden Umschläge
- Kein mit Lebensmittelresten (z.B. Schokolade) verunreinigtes Papier ins Altpapier
- Kartons möglichst nur zusammenlegen, nicht in kleine Stücke zerreißen (das erleichtert das Sortieren sowohl maschinell wie auch von Hand).

Even Gift Wrapping Paper Can be Recycled

Keep Paper for Recycling Easy to Sort – Tips for the Morning after Christmas

Christmas means a flood of small and large gifts, but also a flood of packaging. What ends up in the paper bin, must be

sorted and separated. First by a mechanical pre-sorting, concluded by hand – at least if the recycled paper will be used for new newspapers again. The brown

and grey fibres from board and boxes cannot be transformed into white fibres in the recycling process.

This is why the two fractions go separate ways from here: White paper goes into the paper mills to produce newspaper from it. A mixture of white paper and brown cardboard is recycled by board mills to produce new boxes and cartons.

This is how the flood of packaging can be better sorted and recycled:

- As far as possible, do not crumple gift wrapping, but lay it flat into the paper bin for recycling
- Remove cords, ribbons and stickers
- If possible remove adhesive tape and adhesive labels (residues of adhesives disturb the papermaking)
- For your Christmas mail if possible prefer wet bonding and avoid self-adhesive envelopes
- No paper with food residues (e. g., chocolate or pizza) into the paper for recycling
- Just fold large carton boxes, do not tear them into small pieces (this facilitates both mechanical as well as hand sorting).

INGEDE Symposium 2017

The INGEDE Symposium 2017 will take place on Wednesday, 8 February 2017 from 10:00 to 17:15 at "Haus der Bayerischen Wirtschaft" in Munich, room "Europasaal".

Registration: Free of charge for participants of member companies, representatives of associations and the press, for all others we charge 200 €.

Please contact us for an invitation if you're not on our mailing list yet.

26th INGEDE Symposium

8 February 2017

Preliminary Programme

09:30	Registration and Coffee
10:00	Welcome and Introduction, INGEDE's Activities 2016/2017 Thomas Krauthauf
10:30	Keynote: Roadmap 2050 N. N., CEPI
11:00	The IMPACTPaperRec Project: European Multi-Stakeholder Cooperation to Improve Paper Recycling Rates Lisa Labriga
11:30	Processing High Grade Paper for Recycling Anne-Katrin Klar
12:00	Lunch
13:15	Recyclability – Databases, Scorecards, Standards Andreas Faul
13:30	Environmental Impact and Sustainable Aspects of Digital Printing at CEWE Matthias Hausmann
14:00	DIN SPEC 55700 – Deinkability Test for Printed Paper Products Peter Hengesbach
14:30	Deinkability Update: Drupa, Digital Prints, UV Cured Prints Axel Fischer
15:00	Coffee
15:30	Sorting Plant Design Manfred Geistbeck
15:45	Sorting Plant Design (Stora Enso Langerbrugge) Manuela Suttnig, REDWAVE
16:15	Sorting Plant Operation Manfred Geistbeck
16:30	INGEDE Projects Johann Oberndorfer
16:50	INGEDE's New Website Axel Fischer
17:00	Wrap-up and Closure Thomas Krauthauf
17:15 h	End of Symposium

Conference languages will be German and English with simultaneous translation
